

On Saturday, September 8, I joined in my first NCAA Football Game at SDCCU Stadium. My friends and I were very excited. We went to the SDSU's party, ate the pizza, played the game and got the SDSU Football Team's t-shirt. After the party, we went to the stadium. Before the game started, the cheerleaders wanted us to shout slogans.. At the beginning of the game, Aztecs quickly got the score. The audience all jumped up and cheered. The game in the third inning, the opponent is ahead of Aztecs and one of Aztecs's players got hurt. In the end, SDSU won this game. This was the happy ending. After the game, there was a big firework show. It was very beautifully.

I have only seen the football game on TV a few times. This was my first experience at a big time football game. When the game start, everybody said the slogan is very shocking. It felt different from watching TV. To go to the stadium made me more enjoy than watching TV. The football is not famous in my country. So we didn't have any football games. This was a great experience in my life. When I go back my country, I can share it with my family any my friend.

I bought the baseball game ticket in ALI. This ticket was for San Diego Padres to Texas Rangers on September 14. That day, we were gathering in ALI. ALI's staff took us to the stadium. We took the trolley to the field. On our way to the road, we met the fire. The fire prevented the trolley from moving. So we decided to go back to school and took the bus to the stadium. We were late. When we arrived the at stadium, the baseball game had begun. I saw many shop and people. They sold

many clothing about San Diego Padres. I wanted to buy something but we didn't have any extra time to go shopping. When I saw the game, Padres didn't get any points. Later, Rangers knocked out a home run. Until the end, Padres never got any points and lost the game.

When I stayed in Taiwan, I watched MLB with my father and brother on TV. I never went to the stadium to see any baseball games. So it was my first time. Although this game was not exciting, I still liked to watch the game on the court feeling. I'm sure I'll watch the game again and early to go there. I really want to look at Padres's merchandise.

On October 12th, my friends and I took the uber to the Pacific Coast Skydiving on about 1:00 pm. First, we need to sign a contract. Then we waited for about one hour before we went skydiving. My friends went skydiving first and I took the video for them. The staff took us to their landing site and waited for them. When they were jumping, they looked like a small white point. I thought they just spent a few seconds to land but it was beyond my expectations. It spent almost a minute. Finally, We were next but I was not afraid to go skydiving. I was very excited. I walked to the airport and took the plane. The plane is very small. It could only accommodate five people. I saw a lot of views after the plane took off. The coach introduced these views. After the scenic tour was over, I went skydiving. When I jumped, I felt my heart was stop. I was through the clouds and I looked down on the land. It made me feel I was a god.

This experience let me impressive. It was my first time to skydive and take a small plane. When I reached the land, I felt dizzy. This feeling was still all day. It let

me decide never skydive again but I still recommend my friends and family to challenge once time. Before I had been United States, I was ready to decide to challenge skydiving. I wanted to face on my fear and beat it. I believed I have grown a lot since this incident. When I had the courage to jump down, I thought there was not any problem to beat me. This was a great experience. When I go back Taiwan, I will share this experience with my friends and family.

On October 15, We went to the Potato Chip Rock. We had six people so we were going to rent a car. Drove from our rendezvous to the Potato Chip Rock for about 40 minutes. It was my first to drive the car on United States so I was very nervous. We had been looking for the entrance for some time. It was not obvious. It was a jungle road before you reach the hiking trail. Today was a sunny day but had many cold wind. The scenery along the road was very beautiful. The road was steep and it made me miserable.

This experience was miserable. Although the scenery was beautiful, It was hard to reach the top of the mountain. When I reached the top, I felt the prostration. I though I never went back again. It was very tired. When I saw the Potato Chip Rock, I just felt why I spent a lot of time to see a rock. But it was okay, I had done a challenge.

We went to STAPLES Center at Oct 25th. We saw the basketball game was Lakers vs Nuggets. The game began on 7:30 pm so we went to other place on the morning. We went to Hollywood Walk of Fame when we finished our breakfast. On the afternoon, we went to Grand Central Market and the last bookstore. Finally, we

went to STAPLES Center. Lakers won this game and this was a first win in STAPLES.

My favorite was basketball so I was looking forward to see the NBA game. When I arrived at STAPLES Center, I was excited. I saw a big LeBron James's billboard and many bronze statues. These great players were made into bronze statues, like Magic Johnson, Jerry West, Jabbar, Shaquille O'Neal. I was very happy to take picture with them. Then I bought a jersey. This jersey was number 7 that was my favorite basketball player Javale Mcgee. I could not find his jersey in my country so I was happy to buy it. This game was very exciting because the game continued until the last few seconds before we knew who won the game. Although our seats were far away, the enthusiasm of the audience had made us more fully integrated into this game. I thought that watching this game live was worth the money. I really wanted to watch the NBA game again. I had completed one of my dreams.

On September 14th, I went to play bowling game with classmates. This was a class activity and professor grouped us. This activity was divided into three categories. One was table tennis, one was billiard and the other was bowling. I was divided into the bowling game and then a group of two people. We needed to play two games. At last my group lost two games.

I rarely played bowling. I was not good at bowling. I was sorry to my partner because my partner was very good at bowling. I could not got more points to help her win. Maybe next time, if we would play basketball game, I could let her win. But I liked to everybody play together. We was happy and focused on the movement process. Although the game would win and lose, I believed no one cared about

winning or losing at this moment. In this activity, everybody enjoyed sports not winning or losing. By the way, I needed to improve my bowling skill.

On Nov 8, my classmates and I decided to play basketball after the class. When the class over, we were excited to run to the basketball court and play basketball. We were as like as a primary school student. I haven't been excited about playing basketball for a long time. We played three to three and five to five for some time, and then there were some American guys join us. We all very enjoy in that moment, it was really fun and interested. After coming here for a few months, finally have this opportunity to play with local.

This was a very special experience for us. I like basketball so much, I used to play basketball with my friends after school. Because of study, I spend less time on my favourite sport. I am determined to take a little time to play, no matter how busy I am. Basketball is a good sport, it can make different people communicate in basketball game.

Since I came to SDSU, I have liked going to the gym. SDSU's gym was good and big place. It offered a great environment for everyone to get fit. When I first came here, I felt amazing. Why did the college have a awesome gym. In my Taiwan's college, we only had a small space and a little equipment gym. So every time the class was over, I almost came to gym.

I was not happy with my skinny body. So I wished my body could be strong. I had many experienced sports but I thought fitness was one of the most painful sports. In order to make the body better, I only kept sticking to it. Then I found it interesting. Everyone had a fitness mode of their own. You had to help yourself get your own

fitness classes. In fact, the sport was not compared with others. But everyday you were competing with yesterday's own.

On December 5, There was a game in SDSU. It was San Diego State University vs. San Diego University. My friends and I decided to watch this game. I really wanted to see our basketball school team game. The game began at 7:00 but we arrived early. We were very lucky, our seat was very close to the players. When the game started, I found our classmate on the court. In the first half we continued to lead until the second half we were reversed.

I think it was very cool to see my classmates playing on the court. Although the game lost, they performed very well. The rules of this game were quite special. The general basketball game was divided into four sections, but this was only two sections. One section had 20 minutes. The fans at the scene were very crazy. Fans said very ugly words to the enemy, but I thought this had a feeling of home. This was a good experience.

On Nov 28, we had a football game in the class. On 9:00 am, The people who started the event were explaining the rules and then grouping them. Later they gave us a period of practice. We won both games and we won the first place.

This was my first time to play football game. This was really fun. Although I didn't help the team a lot. Football was very particular about teamwork. This time the football event was not the same as the real game, but I still had a good time. I hope to experience the real football game next time. I was very grateful to my teammates for letting us get the first.
